Contents of Volume 74

No. 1. JANUARY 1993

BRIEF REVIEW

Electrolyte and fluid transport across the mature alveolar epithelium
G. Saumon and G. Basset 1

Abdominal muscle activation by respiratory stimuli in conscious dogs
F. Yasuma, R. J. Kimoff, L. F. Kozar, S. J. England, T. D. Bradley, and E. A. Phillipson 16

Cooling the pulmonary blood in dogs alters activity of pulmonary vagal afferents
G. G. Giesbrecht, T. E. Pisarri, J. C. G. Coleridge, and H. M. Coleridge 24

Nonadrenergic noncholinergic neurotransmitter of feline trachealis: VIP or nitric oxide?
J. T. Fisher, J. W. Anderson, and M. A. Waldron 31

Interactions between Hb, Mg, DPG, ATP, and Cl determine the change in Hb-O_2 affinity at high altitude
H. Mairbäurl, O. Oelz, and P. Bärtsch 40

Young and old subjects matched for aerobic capacity have similar noradrenergic responses to exercise
G. M. Kastello, M. S. Sothmann, and V. S. Murthy 49

Effect of a single air dive on pulmonary diffusing capacity in professional divers
Ž. Dujić, D. Eterović, P. Denoble, G. Krstačić, J. Tocilj, and S. Gošović 55

Disappearance of palmitic acid from plasma of fetal and newborn sheep
G. G. Power, Y. Yoneyama, H. Asakura, and R. Sawa 62

Delayed poststimulus decrease of phrenic motoneuron output produced by phrenic nerve afferent stimulation
J. D. Road, S. Osborne, and Y. Wakai 68

Response of genioglossus EMG activity to passive tilt in men
M. J. Wasicko, S. L. Knuth, and J. C. Leiter 73

Thermoregulatory responses to hyperthermia during isoflurane anesthesia in humans
D. E. Washington, D. I. Sessler, A. Moayeri, B. Merrifield, J. McGuire, M. Prager, K. Belani, S. Hudson, and M. Schroeder 82

Breathing, transcutaneous blood gases, and CO_2 response in SIDS siblings and control infants during sleep
T. Schäfer, D. Schäfer, and M. E. Schläfke 88

Stimulation of vagal afferents inhibits locomotion in mesencephalic cats
J. G. Pickar, J. M. Hill, and M. P. Kaufman 103

Amiloride blocks the inhibition of fetal lung liquid secretion caused by AVP but not by asphyxia
S. B. Hooper, M. J. Wallace, and R. Harding 111

Interaction of oscillatory and steady turbulent flows in airway tubes during impedance measurement
B. Louis and D. Isabey 116

Edema clearance in isolated sheep lungs
D. B. Pearse, E. M. Wagner, and J. T. Sylvester 126

Endogenous substrate oxidation during exercise and variations in breath $^{13}CO_2/^{12}CO_2$
J.-F. Gautier, F. Pirnay, B. Jandrain, M. Lacroix, F. Mosora, A. J. Scheen, and P. J. Lefèbvre 133

Species differences in pulmonary vasoactive responses to histamine, 5-hydroxytryptamine, and KCl
J. D. Bradley, P. B. Zanaboni, and T. E. Dahms 139

Regional blood flow during closed-chest cardiac resuscitation in rats
C. Duggal, M. H. Weil, R. J. Gazmuri, W. Tang, S. Sun, F. O'Connell, and M. Ali 147

Hypoproteinemia slows lung liquid clearance in young lambs
J. J. Cummings, D. P. Carlton, F. R. Poulain, J. U. Raj, and R. D. Bland 153

J. J. Cummings, D. P. Carlton, F. R. Poulain, J. U. Raj, and R. D. Bland 153

CONTENTS OF VOLUME 74

Pulmonary impedance and right ventricular-vascular coupling during coronary angioplasty
W. G. Kussmaul III, J. Wieland, J. Altschuler, and W. K. Laskey 161

Behavior of coactive muscles during fatigue
J. A. Psek and E. Cafarelli 170

Alveolar liquid and protein clearance in the absence of blood flow or ventilation in sheep
T. Sakuma, J. F. Pittet, C. Jayr, and M. A. Matthay 176

Effects of reduced O_2 delivery with anemia, hypoxia, or ischemia on peak $\dot{V}o_2$ and force in skeletal muscle
S. L. Dodd, S. K. Powers, E. Brooks, and M. P. Crawford 186

Cytochrome oxidase in muscle of endurance-trained rats: subunit mRNA contents and heme synthesis
G. P. Town and D. A. Essig 192

Lung volume, pressure, flow, and density relationships during constant-flow ventilation in dogs
W. Brampton and J. D. Young 197

Regional blood flow in conscious resting rats determined by microsphere distribution
I. Kuwahira, N. C. Gonzalez, N. Heisler, and J. Piiper 203

Changes in regional blood flow distribution and oxygen supply during hypoxia in conscious rats
I. Kuwahira, N. C. Gonzalez, N. Heisler, and J. Piiper 211

Influence of signal processing on estimation of respiratory impedance
H. Lorino, C. Mariette, M. Karouia, and A.-M. Lorino 215

Thromboxane contributes to pulmonary hypertension in ischemia-reperfusion lung injury
C. A. Zamora, D. A. Baron, and J. E. Heffner 224

Effects of acute and chronic acetazolamide on resting ventilation and ventilatory responses in men
E. R. Swenson and J. M. B. Hughes 230

Functional significance of expiratory muscles during spontaneous breathing in anesthetized dogs
G. A. Farkas and M. A. Schroeder 238

Middle cerebral artery blood velocity and cerebral blood flow and O_2 uptake during dynamic exercise
P. L. Madsen, B. K. Sperling, T. Warming, J. F. Schmidt, N. H. Secher, G. Wildschiødtz, S. Holm, and N. A. Lassen 245

Protection against platelet-activating factor-induced injury by interferon inducer in perfused rabbit lung
Y.-C. T. Huang, T. P. Kennedy, Y.-F. Su, W. D. Watkins, A. R. Whorton, and C. A. Piantadosi 251

Capsaicin-induced bronchial vasodilation in dogs: central and peripheral neural mechanisms
T. E. Pisarri, J. C. G. Coleridge, and H. M. Coleridge 259

Diaphragmatic function after resistive breathing in vitamin E-deficient rats
A. Anzueto, F. H. Andrade, L. C. Maxwell, S. M. Levine, R. A. Lawrence, and S. G. Jenkinson 267

Identification of neutral endopeptidase mRNA in human nasal mucosa
J. N. Baraniuk, K. Ohkubo, O. J. Kwon, J. Mak, J. Rohde, M. A. Kaliner, S. R. Durham, and P. J. Barnes 272

Cl^- replacement alters the ventilatory response to central chemoreceptor stimulation
T. L. Davidson, M. P. Sullivan, K. E. Swanson, and J. M. Adams 280

Orthostatic intolerance during a 13-day bed rest does not result from increased leg compliance
F. M. Melchior and S. M. Fortney 286

Increased insulin suppression of plasma free fatty acid concentration in exercise-trained rats
J.-M. Lavoie, J. Bongbélé, S. Cardin, M. Bélisle, J. Terrettaz, and G. van de Werve 293

Atypical β-adrenoceptor- (β_3-adrenoceptor) mediated relaxation of canine isolated bronchial smooth muscle
J. Tamaoki, F. Yamauchi, A. Chiyotani, I. Yamawaki, S. Takeuchi, and K. Konno 297

Hypoxic ventilatory responsiveness in Tibetan compared with Han residents of 3,658 m
J. Zhuang, T. Droma, S. Sun, C. Janes, R. E. McCullough, R. G. McCullough, A. Cymerman, S. Y. Huang, J. T. Reeves, and L. G. Moore 303

Minimal hypoxic pulmonary hypertension in normal Tibetans at 3,658 m
B. M. Groves, T. Droma, J. R. Sutton, R. G. McCullough, R. E. McCullough, J. Zhuang, G. Rapmund, S. Sun, C. Janes, and L. G. Moore 312

Cerebral blood velocity and other ca.diovascular responses to 2 days of head-down tilt
M. A. B. Frey, T. H. Mader, J. P. Bagian, J. B. Charles, and R. T. Meehan 319

Effects of fatigue on the length-tetanic force relationship of the rat diaphragm
A. P. Gauthier, R. E. Faltus, P. T. Macklem, and F. Bellemare 326

Acute effect of cigarette smoke on breathing is attenuated by chronic smoking in rats
A. Swanny, R. F. Morton, and L.-Y. Lee 333

Maintained endothelium-dependent pulmonary vasodilation following chronic hypoxia in the rat
R. D. Russ and B. R. Walker 339

Respiratory response to pulmonary vascular congestion in intact conscious dogs
G. G. Giesbrecht and M. Younes 345

Higher levels of erythrocyte membrane fluidity in sprinters and long-distance runners
T. Kamada, S. Tokuda, S.-I. Aozaki, and S. Otsuji 354

Intended rather than actual movement velocity determines velocity-specific training response
D. G. Behm and D. G. Sale 359

Changes in respiratory mechanics with age
C. J. Lanteri and P. D. Sly 369

Peripheral chemoreceptor function in children with the congenital central hypoventilation syndrome
D. Gozal, C. L. Marcus, D. Shoseyov, and T. G. Keens 379

Chronic exercise enhances in vivo and in vitro cytotoxic mechanisms of natural immunity in mice
B. MacNeil and L. Hoffman-Goetz 388

Effects of 5-hydroxytryptamine and 5-hydroxytryptophan infusion on the human cough reflex
R. A. Stone, Y.-M. Worsdell, R. W. Fuller, and P. J. Barnes 396

Seven-day validation of doubly labeled water method using indirect room calorimetry
J. L. Seale, J. M. Conway, and J. J. Canary 402

Insulin-like growth factor immunoreactivity increases in muscle after acute eccentric contractions
Z. Yan, R. B. Biggs, and F. W. Booth 410

Effect of posture on static lung volumes and pulmonary mechanics in pneumonectomized rabbits
L. E. Olson 415

Protective effects of anti-O polysaccharide and anti-lipid A monoclonal antibodies on pulmonary hemodynamics
T.-Y. Chen, H. S. Warren, E. Greene, K. M. Black, C. G. Frostell, D. R. Robinson, and W. M. Zapol 423

Blood flow to respiratory muscles and major organs during inspiratory flow resistive loads
L. M. Pang, Y.-J. Kim, and A. R. Bazzy 428

Lactate kinetics in resting and exercising forearms during moderate-intensity supine leg exercise
P. G. Catcheside and G. C. Scroop 435

Chronic catheterization of external iliac vessels in growing cattle
Y. R. Boisclair, A. W. Bell, and D. E. Bauman 444

Effects of different heavy-resistance exercise protocols on plasma β-endorphin concentrations
W. J. Kraemer, J. E. Dziados, L. J. Marchitelli, S. E. Gordon, E. A. Harman, R. Mello, S. J. Fleck, P. N. Frykman, and N. T. Triplett 450

Airway and vascular effects of 8-epi-prostaglandin $F_{2\alpha}$ in isolated perfused rat lung
K. H. Kang, J. D. Morrow, L. J. Roberts II, J. H. Newman, and M. Banerjee 460

SPECIAL COMMUNICATIONS

Flexible intravenous microdialysis probe for blood sampling in freely moving rats
P. Rada, M. Parada, and L. Hernandez 466

Water-sealed spirometer for measurements in newborns and infants
I. T. Merth, G. J. Verschragen, I. C. W. Olievier, P. J. de Winter, and P. H. Quanjer 470

Fast-response whole body indirect calorimeters for infants
J. K. Moon, C. L. Jensen, and N. F. Butte 476

Indirect calorimetry with a hood: flow requirements, accuracy, and minute ventilation measurement
B. E. Pennock and M. Donahoe 485

Age-related changes of human aortic flow wave velocity measured noninvasively by magnetic resonance imaging
R. H. Mohiaddin, D. N. Firmin, and D. B. Longmore 492

No. 2. FEBRUARY 1993

BRIEF REVIEW

Mean circulatory filling pressure: its meaning and measurement
C. F. Rothe 499

Acute hemorrhage in dogs: construction and validation of models to quantify blood loss
Y. Waisman, P. Q. Eichacker, S. M. Banks, W. D. Hoffman, T. J. MacVittie, and C. Natanson 510

Muscle damage is not a function of muscle force but active muscle strain
R. L. Lieber and J. Fridén 520

Absence of a growth hormone effect on rat soleus atrophy during a 4-day spaceflight
B. Jiang, R. R. Roy, C. Navarro, and V. R. Edgerton 527

Mapping of electrical muscle stimulation using MRI
G. R. Adams, R. T. Harris, D. Woodard, and G. A. Dudley 532

Airway-parenchymal interdependence and bronchial responsiveness in two highly inbred rat strains
R. J. Dandurand, L. J. Xu, J. G. Martin, and D. H. Eidelman 538

Centrally administered ouabain aggravates central sleep apneas
T. Sato, M. Tadokoro, H. Kaba, H. Saito, K. Seto, and H. Takatsuji 545

N^G-monomethyl-L-arginine paradoxically relaxes preconstricted canine intrapulmonary arteries
C.-M. Tseng, L. W. Goodman, L. J. Rubin, and M. L. Tod 549

Blood-tissue transport of exogenous albumin and immunoglobulin G in genetically analbuminemic rats
E. M. Renkin, V. L. Tucker, H. Wiig, G. Kaysen, L. Sibley, M. Decarlo, K. Simanonok, and M. Wong 559

Vascular conductance and aerobic power in sedentary and active subjects and heart failure patients
J. L. Reading, J. M. Goodman, M. J. Plyley, J. S. Floras, P. P. Liu, P. R. McLaughlin, and R. J. Shephard 567

Central and spinal effects of sodium cyanide on respiratory activity
M. A. Haxhiu, B. Erokwu, E. van Lunteren, N. S. Cherniack, and K. P. Strohl 574

Microvascular damage in the cortex of cat brain from middle cerebral artery occlusion and reperfusion
D. F. Wilson, S. Gomi, A. Pastuszko, and J. H. Greenberg 580

Effects of naloxone on the sensation of dyspnea during acute respiratory stress in normal adults
Y. Akiyama, M. Nishimura, S. Kobayashi, A. Yoshioka, M. Yamamoto, K. Miyamoto, and Y. Kawakami 590

Effect of a 5-lipoxygenase inhibitor on endotoxin-induced pulmonary dysfunction in awake sheep
Y. Kuratomi, P. L. Lefferts, B. W. Christman, R. E. Parker, W. G. Smith, R. A. Mueller, and J. R. Snapper 596

Food restriction-induced transformations in cardiac functional and biochemical properties in rats

Regional coupling between chest wall and lung expansion during HFV: a positron imaging study
J. G. Venegas, K. Tsuzaki, B. J. Fox, B. A. Simon, and C. A. Hales 2242

Effects of acute sleep deprivation on control of the diaphragm during REM sleep in cats
S. C. Veasey, J. C. Hendricks, L. R. Kline, and A. I. Pack 2253

Effect of selective diaphragmatic paralysis on the inspiratory motor drive
J. Teitelbaum, C. O. Borel, S. Magder, R. J. Traystman, and S. N. A. Hussain 2261

Effect of hypercapnia on the arousal response to airway occlusion during sleep in normal subjects
R. B. Berry, C. K. Mahutte, and R. W. Light 2269

Functional and structural adaptation of the yak pulmonary circulation to residence at high altitude
A. G. Durmowicz, S. Hofmeister, T. K. Kadyraliev, A. A. Aldashev, and K. R. Stenmark 2276

Effects of mean airway pressure and tidal volume on lung and chest wall mechanics in the dog
G. M. Barnas and J. Sprung 2286

Slow force recovery after long-duration exercise: metabolic and activation factors in muscle fatigue
A. J. Baker, K. G. Kostov, R. G. Miller, and M. W. Weiner 2294

Effect of metabolic acidosis on pulmonary gas exchange of artificially ventilated dogs
A. Frans, T. Clerbaux, E. Willems, and F. Kreuzer 2301

Respiratory response to abdominal and rib cage muscle paralysis in dogs
J.-F. Brichant, M. Gorini, and A. De Troyer 2309

Energetics of best performances in middle-distance running
P. E. Di Prampero, C. Capelli, P. Pagliaro, G. Antonutto, M. Girardis, P. Zamparo, and R. G. Soule 2318

Development of conditioning programs for dressage horses based on time-motion analysis of competitions
H. M. Clayton 2325

Electrochemical detection of catecholamine release from rat carotid body in vitro
D. F. Donnelly 2330

Contribution of vagal afferents to respiratory reflexes evoked by acute inhalation of ozone in dogs
E. S. Schelegle, M. L. Carl, H. M. Coleridge, J. C. G. Coleridge, and J. F. Green 2338

Acute inhalation of ozone stimulates bronchial C-fibers and rapidly adapting receptors in dogs
J. C. G. Coleridge, H. M. Coleridge, E. S. Schelegle, and J. F. Green 2345

Breath $^{13}CO_2$ background enrichment during exercise: diet-related differences between Europe and America
A. J. M. Wagenmakers, N. J. Rehrer, F. Brouns, W. H. M. Saris, and D. Halliday 2353

Inherent coupling of elastic and dissipative behavior of the lung through a viscoelastic time constant
T. Nicolai, C. J. Lanteri, and P. D. Sly 2358

Hypoxic potentiation of the ventilatory response to dynamic forearm exercise
R. F. Fregosi and D. R. Seals 2365

Techniques for measuring respiratory mechanics: an analytic approach with a viscoelastic model
A. M. Lorino and A. Harf 2373

Respiratory and cardiovascular effects of inhaled and intravenous bradykinin, PGE_2, and $PGF_{2\alpha}$ in dogs
J.-A. Karlsson, F. B. Sant'Ambrogio, K. Forsberg, F. Palecek, O. P. Mathew, and G. Sant'Ambrogio 2380

Effect of low O_2 on glucose uptake in rabbit carotid body
A. Obeso, C. Gonzalez, R. Rigual, B. Dinger, and S. Fidone 2387

Tumor necrosis factor-alpha inhibits endothelium-dependent relaxation
S. Greenberg, J. Xie, Y. Wang, B. Cai, J. Kolls, S. Nelson, A. Hyman, W. R. Summer, and H. Lippton 2394

Glucose dynamics and gluconeogenesis during and after prolonged swimming in rats
C. Ryan, K. Ferguson, and J. Radziuk 2404

Heparin-protamine reactions in pigs: role of oxygen-derived free radicals
B. Vollmar, P. F. Conzen, H. Habazettl, E. Yekebas, and K. Peter 2412

Respiratory epithelium modulates the responses of canine bronchi to cooling
Y. Gao and P. M. Vanhoutte 2421

Effects of insulin, glucose analogues, and pyruvate on vascular responses to anoxia in isolated ferret lungs
C. M. Wiener and J. T. Sylvester 2426

TNF-α and cyclooxygenase metabolites do not modulate *C. albicans* septic shock with disseminated candidiasis
G. M. Matuschak, C. A. Klein, T. L. Tredway, D. R. Schilly, and A. J. Lechner 2432

Response of upper airway and chest wall muscles to selective brain stem hypoxia in the newborn
L. Cattarossi, B. Haxhiu-Poskurica, M. A. Haxhiu, and W. A. Carlo 2443

Interstitial space and collagen alterations of the developing rat diaphragm
L. E. Gosselin, D. A. Martinez, A. C. Vailas, and G. C. Sieck 2450

Role of peptidases and NK_1 receptors in vascular extravasation induced by bradykinin in rat nasal mucosa
C. Bertrand, P. Geppetti, J. Baker, G. Petersson, G. Piedimonte, and J. A. Nadel 2456

NK_1 receptors mediate neurogenic inflammatory increase in blood flow in rat airways
G. Piedimonte, J. I. E. Hoffman, W. K. Husseini, R. M. Snider, M. C. Desai, and J. A. Nadel 2462

Baroreflex function and cardiac structure with moderate endurance training in normotensive men
M. P. McDonald, A. J. Sanfilippo, and G. K. Savard 2469

Strength training increases regional bone mineral density and bone remodeling in middle-aged and older men
A. Menkes, S. Mazel, R. A. Redmond, K. Koffler, C. R. Libanati, C. M. Gundberg, T. M. Zizic, J. M. Hagberg, R. E. Pratley, and B. F. Hurley 2478

Facilitation and inhibition of phrenic motoneuronal activities by lung inflation
J.-C. Hwang and W. M. St. John 2485

Perilla ketone increases endothelial cell monolayer permeability in vitro
C. M. Waters, J. S. Alexander, T. R. Harris, and F. R. Haselton 2493

Segmental vascular pressures in lung embolism
I. C. Ehrhart and W. F. Hofman 2502

Activity-induced regulation of myosin isoform distribution: comparison of two contractile activity programs
G. M. Diffee, V. J. Caiozzo, S. A. McCue, R. E. Herrick, and K. M. Baldwin 2509

Interaction of various mechanical activity models in regulation of myosin heavy chain isoform expression
G. M. Diffee, S. McCue, A. LaRosa, R. E. Herrick, and K. M. Baldwin 2517

Decreased resting levels of adenine nucleotides in human skeletal muscle after high-intensity training
Y. Hellsten-Westing, B. Norman, P. D. Balsom, and B. Sjödin 2523

Influence of nasal airflow and resistance on nasal dilator muscle activities during exercise
D. C. Connel and R. F. Fregosi 2529

A specific endothelin-1 antagonist blocks inhaled endothelin-1-induced bronchoconstriction in sheep
W. M. Abraham, A. Ahmed, A. Cortes, M. J. Spinella, A. B. Malik, and T. T. Andersen 2537

Control of malonyl-CoA by glucose and insulin in perfused skeletal muscle
C. Duan and W. W. Winder 2543

Effect of adrenodemedullation on decline in muscle malonyl-CoA during exercise
W. W. Winder, R. W. Braiden, D. C. Cartmill, C. A. Hutber, and J. P. Jones 2548

Expiratory flow limitation and regulation of end-expiratory lung volume during exercise
R. Pellegrino, V. Brusasco, J. R. Rodarte, and T. G. Babb 2552

Cardiopulmonary reflexes do not modulate exercise pressor reflexes during isometric exercise in humans
J. A. Arrowood, P. K. Mohanty, C. McNamara, and M. D. Thames 2559

MODELING IN PHYSIOLOGY

Computation of aortic flow from pressure in humans using a nonlinear, three-element model
K. H. Wesseling, J. R. C. Jansen, J. J. Settels, and J. J. Schreuder 2566

Nonlinear phenomena in respiratory mechanical measurements
B. Suki 2574
